PROJECTS

EVENT HUB COLLEGE WEBSITE

- Event Hub College Website is a web-based platform developed to manage and showcase college events in an organized way. The website allows students and faculty to view upcoming events, event schedules, announcements, and important details in one place. It provides an easy-to-use interface for accessing event information and improving communication within the college community.
- The project was built using HTML, CSS, JavaScript, and basic web development concepts with a focus on responsive design and user-friendly navigation. It helps reduce manual notice sharing and makes event management more efficient and accessible online.

EDUCATION

KTU technical university

2023 – 2027

B.Tech in Computer science and engineering

CERTIFICATIONS

Responsive Web Design · AI & ML WORKSHOP
